

Hotrod Octa Softbox

In addition to our traditional square Ezybox Hotshoe softbox we have now introduced Octa softboxes for use with battery operated flashguns. The Octas are available in two different sizes and feature an inner diffusion panel and an adaptor plate with rods (which supports the weight of the softbox). The flashgun simply slides into a shoe mount attached to the adaptor plate.

- Features**
- ▶ Octa box for an alternative catchlight
 - ▶ Simple assembly
 - ▶ Slide on shoe mount for flashgun
