

KickerLite PATENTED

The KickerLite is essentially a low level 90cm x 120cm (3' x 4') floor softbox ideal as a fill light to bring out the detail in shadow areas i.e. under the chin and around the eyes. The KickerLite features an 'H' frame support to accommodate a studio flash head taking away the need for an additional light stand. The softbox features a 2 stop diffusion layer and an internal baffle (sunfire/silver) for further light manipulation. The KickerLite can also be used with battery operated flash guns.

Without KickerLite

With KickerLite
